

Walletbuilders Coin Dynamic Roadmap 2017

Providing an alternative viewpoint to blockchain technology and human nature

Exchange Information

Goal

To provide WBC with a mainstream exchange that can attract potential Large investors.

- Provide Liquidity offers to large exchanges in return for listing.
- Deploy paid skills to help us achieve an exchange with a professional environment
- Maintain and ensure the blockchain is moving smooth and no forks are ever necessary
- Adapt and learn from the previous boutique coins that came before us and apply that information in ways that benefit our community.

Technical Analysis

When we look into the past we see numerous coins that have come and gone, many blockchains survive and thrive well at the same time we see numerous projects not even able to make it onto an exchange and essentially die within a few months. The durability and Survivability of WBC is one of our main priorities. We have numerous experts constantly looking over the chain and explorer and pulling out a lot of data for us to study and decide exactly how many coins we should be staking to ensure everyone receives staking rewards on a healthy basis.

From our studying and with input from our experts I am pleased to say that we have got the thumbs up! The TA on WBC has concluded that the majority of users involved have a relatively high quality of life and no significant external pressures that would cause someone to sell coins cheaply with this information provided to numerous investors it starts to make sense why things have taken off so quickly and how we managed to garnish such support from mainstream icons in the industry.

Personal Opinions from the creator

First of all I would like to thank every single one of you who took the time out of your day to look at this road map and my creation. It has been in the works for quite some time and it is great to finally see us fulfilling our goals.

Over the years in crypto we have seen way too many coins come and go with the majority of them simply being made by people who have no idea how blockchain technology works just looking for a quick way to make a buck and while I welcome all people from the third world pulling themselves out of poverty with this Tech it has started to become a burden on the resources that many of us use every day. (Coinmarketcap, Nova, Yobit, Explorers..Etc)

Our goal with this project is to put an end to that! We want to create a way for users to identify, call out and crush these scam like projects before they even get a chance to begin. Public perception is everything these days and if you can make the public aware of what they are really about to invest in they may decide to make a different decision if they could get some input from experts in the field such as us.

Diagram of the WBC Network

Short term and longterm goals

Months 1-3

Exchange Goals:
Coinismarkets - Achieved
Yobit
Nova Exchange - Achieved

Price Goals:
Maintain a price above 20K SAT

Upgrade Goals:
Touch up Website
Get graphics for BCT thread
Open a livechat

Months 3-12

Exchange Goals:
Poloneix
Bittrex
Cryptopia

Price Goals:
Maintain a price over 50K-100K SAT

Upgrade Goals:
Mobile Wallet
Electrum Wallet
New website
New wallet GFX
